Potentially Preventable Complications (PPC)

About this report

Senate Bill 7, 82nd Legislature, First Called Session, 2011, and S.B. 7, 83rd Legislature, Regular Session, 2013, requires HHSC to implement a reporting process and reimbursement reductions to hospitals based on performance in potentially preventable readmissions (PPRs) and potentially preventable complications (PPCs). In fee-for-service (FFS) Medicaid, actual rates of these potentially preventable events are compared to expected rates and a final reimbursement adjustment is determined and applied to all claims paid by HHSC.

Hospitals can be penalized up to 2% for a PPC actual to expected ratio of 1.10 or greater (10% above the statewide risk adjusted average) or 2.5% for a PPC actual to expected ratio of greater than 1.25 (25% above the statewide, risk adjusted average).

This report is designed to help hospitals target their improvement efforts. HHSC will provide underlying detailed data for this report through an e-mail request (please include full name, email, phone number, NPI, TPI, and hospital name) to MCD_PPR_PPC@hhsc.state.tx.us
